SUMMARY

Results-driven Front-End Developer and Computer Science student with hands-on experience building scalable, high-performance web applications. Proficient in modern JavaScript ecosystems, particularly React.js and Next.js, with a strong focus on responsive UI architecture, global state management, and seamless API integrations. Adept at transforming complex requirements into clean, maintainable code to deliver exceptional user experiences.

SKILLS

- **Technical Skills:** HTML, CSS, JavaScript, React, Next.js, Redux, Tailwind CSS, Bootstrap, ShadCN UI, DaisyUI, HeroUI, Git & GitHub, Responsive Design & Cross-Device Layouts, Vercel, ClickUp, RESTful API, snyk
- **Soft Skills:** Fast learner, Attention to detail, Communication skills, Debugging & Problem Solving, Clean & maintainable code writing

WORK EXPERIENCE

Front-End Developer (Subcontracted Work)

November 2024 - February 2026

Adfaz

Remote

- Supported the development of more than 50 Salla Stores through internal subcontracting.
- Enhanced visual appeal and interactivity for multiple e-commerce stores by customizing CSS and JavaScript.
- Improved user experience by implementing responsive designs and UI enhancements across multiple e-commerce platforms.
- Resolved critical styling and UI bugs, leading to an estimated 20%+ improvement in user task completion rates and overall platform usability.
- Delivered high-quality code and met project deadlines.

Frontend Developer

June 2025 - Present

Freelance

Remote

- Developed responsive web interfaces using HTML, CSS, JavaScript, React, and Next.js.
- Developed modern UI components using Tailwind CSS, enhancing user experience with smooth animations.
- Integrated RESTful APIs to display dynamic data in web applications.
- Collaborated with clients to design and deliver responsive websites optimized for mobile and desktop.
- Worked on e-commerce interfaces and landing pages with focus on performance and clean UI.

EDUCATION

Higher technological institute in 10th of ramadan (HTI)

10th Of Ramadan

Bachelor's September 2024 - September 2028 Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming (OOP), Database Management Systems, and Software Engineering.

PROJECTS

LinkedPosts - Enterprise-Grade Social Media Frontend 🔗

Tech Stack: React 19, Vite, Tailwind CSS 4, TanStack Query, React Hook Form, Zod. Engineered a highly responsive, scalable social networking frontend demonstrating advanced architectural patterns and a seamless, native-app-like user experience. Optimized data fetching and server state management utilizing TanStack Query, implementing aggressive caching, prefetching, and infinite scrolling for uninterrupted browsing. Designed a secure, centralized authentication system using React Context API and Higher-Order Components (HOC) to manage protected routes and session states. Developed complex, type-safe forms with real-time validation leveraging React Hook Form and Zod, enhancing data integrity and UX. Implemented a persistent, flicker-free Dark/Light theme engine and optimized overall application performance via component memoization and efficient re-rendering.

ShopMart – Full-Featured E-Commerce Application

Tech Stack: Next.js 16, TypeScript, Redux Toolkit, Tailwind CSS 4, NextAuth.js, Shadcn UI, React Hook Form. Developed a comprehensive, responsive e-commerce platform featuring dynamic product catalogs, advanced search, and complete checkout workflows. Architected robust global state management using Redux Toolkit to seamlessly handle complex shopping cart and wishlist interactions across the application. Implemented a secure authentication system leveraging NextAuth.js and JWT, alongside strict form validation using React Hook Form and Zod. Integrated external RESTful APIs to dynamically fetch products, categories, and manage user order history, ensuring synchronized client-server data. Delivered a premium, accessible user interface with Dark/Light mode support using Shadcn UI, while ensuring security against XSS attacks via DOMPurify.

E7gzly – Smart Clinic Reservation & Queue Management Platform

Tech Stack: Next.js 15, TypeScript, Tailwind CSS 4, Shadcn UI, Supabase (PostgreSQL). Engineered a high-performance, real-time healthcare ecosystem that digitizes clinic workflows and eliminates physical wait times through a “Virtual Queuing” system. Developed a responsive, mobile-first frontend with Next.js 15 App Router and React Server Components (RSC) to achieve zero-bundle-size data fetching and optimal Core Web Vitals. Implemented real-time queue tracking and Optimistic UI updates using Supabase Realtime, providing seamless live feedback for both patients and healthcare providers. Built a secure, centralized Role-Based Access Control (RBAC) architecture using Next.js Middleware and PostgreSQL Row-Level Security (RLS) to ensure data privacy. Integrated full Arabic (RTL) localization for a native MENA region user experience.
